

Falsification evidence: two physics-informed reward designs, two failure mechanisms  
(station\_v0\_bogota, reference cell 2022-01-17 seed 0)

Design 1: instantaneous margin  
(Spearman pinned at 1.0 -- no weight escapes it)

Design 2: Round Robin penalized far  
more often than AFAP

Design 2: charging up REDUCES the  
penalty (positive correlation)
